MY INSPIRATION

My dream is to help orphan children throughout the world, providing them a good education, real-life experience and especially love and support that they never received. And this dream of mine keeps me always motivated to work hard and give my best.

PUBLICATION

- Replicating state of brain during OBE
- Research on measuring the brain activity and brain waves of a person while they are lucid dreaming as well as during Astral Projection.
 - Status: On-going, Read [Here](#)

MY GOALS

Short-Term Goal

- Get the title of data scientist after graduation
- Become the best version of myself
- Support my family financially

Long-Term Goal

- Help the orphan children
- Get a good passive cashflow before I turn forty
- Retire at the age of forty and devote my full time for helping orphan children

Life-Long Goal

- Learning new things
- Living with gratitude

DATA ANNOTATION

STRATA (NY), Tenure - 4 Months

- Annotated various image data to supply to cv models
- The annotation tasks included annotating and labeling traffic marking images for the infrastructure development project.

INTERESTS AND HOBBIES

I am interested in studying different languages. Currently, I am teaching myself how to read and write in Korean. I also enjoy reading books which expands my knowledge. I love to watch kdrama, web-series and anime.

PROJECTS COMPLETED

Exploratory Analysis of Geolocational Data

- EDA done for the different cities of Maharashtra State
- Thorough research has done by analyzing covid cases in different cities of Maharashtra
- Analyzed the factors that may or may not affect the rise of covid cases based on location of a city
- All the data used in the analysis has been collected manually from the internet
- Used Power BI for data visualization

Home Automation Using Voice Assistant

- Python is used throughout the project
- ESP8266 is used for controlling light, fan, ac, etc
- Provides home security and emergency system
- Other basic features like texting on whatsapp, emailing, checking whether etc can be done just with a voice command

Covid19 Vaccination Management

- This project is intended to be used as a tool to gather information about the patients who are vaccinated and those who are yet to get vaccine in an organization.

OTHER EXPERIENCES

Data Analytics

- Price prediction using Boston dataset
- Data preprocessing
- Google ads analysis
