DataScience Intern

An engineer seeking challenges in data analytics to help companies with data driven decisions.

EXPERIENCE

- Python, C, C++
- Data Visualization
- SQL / Mysql
- Operating Systems: Windows, Linux(Garuda)

INTERNSHIP

DYPIU (In house)
April 2021 - june 2021
Survey of Different Rumor Detection Models in context to their pros and cons

PROJECTS

Rumor Detection (Python**) —**

An Machine Learning model which predicteds that is a certain tweet a rumor or non rumor

Wind Estimation For Sniping —

Estimating Wind speed to calculate the trajectory of a bullet traveling from shooting side to impact side

Disease Prediction System (Python)

This project predicts disease a person is suffering from using symptoms.

ONGOING PROJECT

Kepler Object of Interest (Data Analysis) —

Analyzing different celestial object's (mainly stars) characteristics for understanding what properties of stars suggest that the KOI host planets (dataset is from kaggel)

SKILLS

Google slides, Google Docs, MySQL Shell , VS code, Google Colab

CERTIFICATIONS

● C & CPP Professional Certificate (Coursera)

● Design Thinking and Global Startup course from Coursera

● Design Thinking from Innovation course from Coursera
